Airtec® Care service - Time for other things

**ISO 9001 Quality – ISO 14001 Environment
– ISO 22000 HACCP Hygienic**

When your humidification system is running problem free I guess that you never give it another thought.

And you actually do not need to, if you have an Airtec® Care service, then we take care of checking and the maintenance of your humidification system.

This way you can go about your daily duties without interruption.

Specialists - To be sure

All our service engineers are specially trained to maintain humidification systems accordingly to our accredited quality, environment but also hygienic standards if this should be required. Maintenance is performed quickly and effectively with a sound professional guarantee.

Airtec® Care originals

Unoriginal spare parts are available everywhere.

But if you want to ensure a long life time for your humidification system it is wise to choose a partner who can supply original spare parts.

- and will perform a correct installation.

As Airtec® Care customer you will have special price advantage on selected spare parts.

Please drop by?

Is your relationship to your humidification service engineer close - if not now is your chance.

With a close relationship to you and your humidification system we can ensure a swift and problem free assistance when it's necessary.

Our nationwide service department makes sure that we are close when needed.

When the user is happy, you are too.

Weather you are responsible for the humidification system or the owner of the company you know what counts – maximum productivity at all times. With an Airtec® Care service agreement you can be sure we have done the preventive care of the system making sure of a stable running of the humidification system.

With an Airtec® Care service agreement you have 2 scheduled appointments in our calendar.

With a service agreement you get a visit from your humidification service engineer twice per year, where he cleans and checks the humidification system and performing preventive care for the system. This means in most cases that the humidification system is performing well and living up to the environmental standards without unnecessary breakdowns.

Your guaranty

We are happy to extend our all ready attractive warranty standards further. As Airtec® Care customer you achieve an extended warranty for your high pressure pump for 4 year and up to 20.000 running hours.

For the system we have 2 years guarantee against material and defects of the production.

Please also see our warranty statement.

Various Airtec® Care solutions – the choice is yours

You have the option of choosing between Airtec® Care1 and Airtec® Care2.

Airtec® Care1, standard operations

The humidification system goes through a functionality test twice per year that is similar to the test the system is exposed to before leaving the factory. We check safety features, pressure, operations, functionality, frequency inverters, water quality and condition. We clean the humidification system as well as performing preventive care so that we ensures that the system is working as cost effectively and environmental friendly as the day the system left the factory.

After service you will receive full documentation for standard operations service.

Airtec® Care2, hygienic operations

In addition to Airtec® Care1 we perform a hygienic analysis of the humidification system and if necessary, perform a disinfection of the system. After ended service you receive full documentation for hygienic operation service.
